Case Study

Supporting a Customer in Growing Their Aggregate Operations

Location: Kenya

Overview:

AMPCO Minerals has built a trusted, long-term partnership with the leading privately held aggregates producer in Kenya. Our role involves delivering complete processing circuits and equipment tailored to the customer's evolving needs. These plants handle a variety of raw materials and produce multiple products for commercial distribution.

The Challenge:

The customer's operations span multiple regions, each with distinct geological and logistical conditions. This diversity demands highly customized solutions—not only in equipment design but also in supporting infrastructure. The customer requires a partner capable of:

- Designing and delivering complete aggregate processing circuits
- Customizing feeding, crushing, and screening equipment solutions
- Engineering support structures compatible with both new and existing facilities.

The Solution:

AMPCO Minerals collaborated closely with the customer to deliver fully integrated, site-specific solutions. Our approach included:

- **Tailored Engineering:** Each plant was designed to meet the unique material and production requirements of its location.
- **Complete Project Execution:** We managed the design, manufacturing, and commissioning.
- **Operational Alignment:** By aligning with the customer's production goals, we ensured optimal plant performance, safety, and regulatory compliance.
- **Scalable Support:** Our deep understanding of the customer's operations enables us to rapidly deploy new circuits or upgrade existing ones with minimal disruption
- **Remote Monitoring:** The ability to oversee equipment remotely, ensuring smooth operations and that production rates are met.

The Results:

This partnership has enabled the customer to expand efficiently and sustainably across multiple regions. Key outcomes include:

- Faster deployment of new plants
- Improved operational efficiency and safety
- Seamless integration of supplemental and replacement equipment
- A scalable model for future growth

AMPCO Minerals remains a strategic partner, delivering value through engineering excellence, operational insight, and responsive support.

We offer a unique combination of small business focus and large corporation expertise. Our global leadership team, made up of industry professionals with diverse experience, has created an environment that blends the agility of small businesses with the industrial expertise, safety, and quality culture characteristics of larger corporations in the crushing and screening industry.

Recognizing that each plant operation is unique, we customize our equipment solutions to meet specific productivity and operational needs. AMPCO Minerals continually adapts to changes, embraces innovation, and strives to deliver exceptional customer experiences.
